

Pedestal Sinks Installation Instructions

Before You Start Installation

We recommend that you consult with a professional if you are unfamiliar with installing this type of product. WS Bath Collections accepts no liability for any damage to the property; floor, walls, plumbing, sink, or personal injury during installation.

Follow up all local plumbing and building codes.

Getting Started

Insure that you have all the requires materials and tools for the installation.

Install sufficient backing behind the finished wall to provide adequate support to secure the mounting hardware (refer to diagram attached). If the studs do not align with the sink, proper wood blocking must be installed between the studs where the sink will mount.

Make sure that in-wall plumbing has already been prepared.

Unpack the new sink and inspect it for damage prior to installation.

Installation

1. Hold the sink up and pedestal at the desired installation location. Ensure that the sink is level, then mark the location of the mounting holes on the back of the sink.
2. Drill pilot holes at the marked locations of the sink's mounting holes.
3. Insert the anchors into the drilled holes, screw in the mounting hanger bolts.
4. Move the sink and pedestal back into position at the installation location.
5. Secure sink with washers and nuts. Be careful not to over tighten the bolts to avoid sink chips and cracks.
6. Proceed to installation of the drain, trap, water supply lines, and the sink faucet.
7. Complete the installation by applying a thin bead of silicone around the back of the sink where it meets the wall.
